

WELCOME MESSAGE

Dear Colleagues,

It is our great pleasure to welcome you to the Hybrid 2nd Indonesian Neonatal and Pediatric Imaging Network Update (NeoPIN 2025), which will take place on 04 – 06 December 2025 at Novotel Jakarta Cikini and also streamed online at <https://neopin.id/annual-conference/>.

This year, NeoPIN carries the theme “Use of Point of Care Ultrasound (POCUS) in Pediatric and Neonatal Surgical Cases: A Step Forward for Clinicians.” The focus reflects how POCUS is becoming an essential bedside tool, not only in radiology or surgery, but also in the hands of clinicians who care for children every day.

Through lectures, live scanning, and interactive workshops, participants will explore the role of ultrasound in early detection, pre-operative evaluation, emergency triage, and safer bedside procedures. The scientific program is designed to be practical, showing how POCUS supports decision-making across pediatric subspecialties and improves outcomes in surgical and critical care situations.

We believe NeoPIN 2025 will be a valuable opportunity for clinicians to strengthen skills, share experiences, and move forward together in advancing pediatric and neonatal care through imaging.

We warmly welcome you to be part of this journey with us.

Chairman of 2nd NeoPIN 2025
